EXPERIENCE

Engineer - II *July 2025 - Present*

Aristocrat Technologies India Pvt Ltd | Noida, Uttar Pradesh

- Developed end-to-end slot-based game logic using TypeScript, JavaScript, and Node.js, covering core gameplay mechanics, state management, and feature flows.
- Contributed to game server development with a strong understanding of RNG, RTP (Return to Player), volatility, and payout mathematics.
- Resolved analytics, stress testing, and profiling issues to improve game performance, reliability, and data accuracy.
- Collaborated with cross-functional teams (game designers, QA, and product) to translate game specifications into reliable backend and game-engine logic, following coding standards and best practices.

Software Developer Engineer - I *July 2022 - July 2025*

Tranzita Systems | Lucknow, Uttar Pradesh

- Designed, developed, and maintained full-stack applications with Flutter (frontend) and Node.js, TypeScript, Firebase/Azure (backend), ensuring responsive UIs and robust backend functionality.
- Collaborated with cross-functional teams in agile settings to deliver scalable, high-quality software, following best practices in version control, code reviews, and testing to ensure smooth deployments and minimal production issues.
- Gained hands-on experience with emerging AI technologies and development tools, including Large Language Models (**LLM**s), Retrieval-Augmented Generation (**RAG**), and Model Context Protocol (**MCP**) servers, and explored their integration into software applications.

Intern Engineer *May 2022 - July 2022*

Cargoflash Pvt Ltd | Gurugram, Haryana

- Learned and applied SQL to write and optimize queries, supporting the development team with efficient data retrieval for API integration.
- Collaborated with backend developers by providing structured database queries, aiding in faster API development and improved data handling.

Web Developer Intern *August 2021 - September 2021*

Spark Foundation | Singapore

- Gained hands-on experience in web development by building responsive UIs using HTML, CSS, and JavaScript, while learning core concepts of frontend and backend integration.
- Developed a **Payment Gateway Interface** using Razor Pages, enabling secure and seamless online transactions for small businesses.

PROJECTS

Digital Slot Based Games

TechStack: Node.js, Express, TypeScript, MongoDB, Git, Docker, GCP

- Build multiple slot based games on an abstract level using typescript.
- Released games in different lobbies.
- Resolved analytics, stress testing, and profiling issues to improve game performance, reliability, and data accuracy.

Car Manual AI Chat Assistant - POC

TechStack: LLMs, LangGraph, MCP, RAG, Node.js, Express, TypeScript, Git, Docker

- Built an AI-powered Car Manual Chat Assistant using RAG, LangChain/LangGraph, and a custom MCP server to provide contextual answers from vehicle documentation.

- Developed a Retrieval-Augmented Generation (RAG) pipeline to retrieve relevant sections from car manuals and generate accurate, context-aware responses to user queries.
- Designed an agentic workflow using LangGraph, enabling the LLM to reason over user queries, retrieve relevant information, and execute appropriate tools through MCP.
- Developed a custom Model Context Protocol (MCP) server to expose manual-search and retrieval capabilities as tools, creating a modular and extensible architecture for automotive assistance.

Stock AI Chat Assistant - POC
TechStack: LLMs, LangGraph, MCP, Zerodha APIs, Node.js, Express, TypeScript, Git, Docker

- Built an AI-powered stock assistant integrating LLMs, LangGraph, Zerodha MCP Server, and Zerodha APIs to enable natural-language interaction with market and portfolio data.
- Designed an agentic, tool-calling workflow using LangGraph, enabling the LLM to interpret user intent, dynamically select appropriate tools, and execute multi-step financial operations.
- Enabled natural-language stock trading by integrating Zerodha's order-placement capabilities, allowing users to buy and sell stocks directly through the AI assistant.
- Implemented workflows for stock analysis, portfolio inspection, market-data retrieval, and trade execution, using a modular MCP-based architecture extensible to additional financial tools.

Shopcircuit: ONDC Digital Commerce Platform | Playstore Link | Appstore Link | Website Link
Tech Stack: Flutter, Node.js, Express, TypeScript, Firebase, MongoDB, Redis, Git, Docker, OAuth

- Built BNP & SNP modules for the ONDC platform using Beckn Protocol.
- Designed and developed RESTful APIs for catalog, search, and order management.
- Created a Flutter-based mobile interface that increased user satisfaction by 25%.
- Ensured ONDC guideline compliance and reduced post-launch bugs by 30%.

SAGE 3.0 Mobile Application | Playstore Link
Tech Stack: Flutter, Node.js, JavaScript, Azure, SQL, Git, Github Actions, OAuth

- Redesigned the app frontend with Flutter for better performance and cross-platform consistency.
- Enhanced backend services using Node.js to support new features and improve data handling.
- Managed seamless migration from SAGE 2.0, incorporating user feedback.

SAGE 2.0 Mobile Application
Tech Stack: Kotlin, Node.js, JavaScript, Azure, SQL, Git, OAuth

- Maintained and optimized existing mobile app features.
- Implemented new functionalities and resolved performance bottlenecks.

OCR Data Input Tool
Tech Stack: Flutter, Google ML Kit, MS Graph API, SharePoint Online, Git, OAuth, MSAL

- Developed a text recognition tool using Google ML Kit for structured data extraction from images.
- Integrated secure OneDrive and SharePoint access using OAuth and Microsoft Graph API.
- Ensured high reliability through extensive testing and debugging.

SKILLS

- **Programming Languages**: TypeScript, JavaScript, Dart, Kotlin
- **Frontend**: ReactJS, JavaScript, Flutter, Dart, HTML, CSS
- **Backend:** Node.js, Express.js, TypeScript, JavaScript
- **Databases**: Mongo, Firestore, SQL, Redis
- **AI Tools & Technologies:** LLMs, Langchain, Langraph, MCP Server, RAG, Claude Code, Copilot
- **Cloud Technologies**: Google Cloud Platform (GCP), Azure, Firebase
- **Tools & DevOps:** Docker, Git, GitHub, Postman, VS Code, Android Studio, WebStorm, MS Office, Linux
- **Other:** RESTful APIs, OAuth, Beckn Protocol, Razor Pages, Microsoft Graph API, ML Kit

CERTIFICATIONS

- **Diploma in O-level (IT)** - NIELIT
- **Certificate in CCC** - NIELIT

EDUCATION

Master of Computer Applications (MCA) August 2020 - July 2022 | CGPA: 8.4
Madan Mohan Malviya University of Technology, Gorakhpur
